

PEOPLE ANALYTICS EXECUTIVE DASHBOARD

Power BI Portfolio Case Study | Synthetic Workforce Data

NorthStar Digital Services (fictional) | Reporting period: Jan 2024 - Jul 2026

1,000	22,586	890	871.2	8.0%
Synthetic employee records	Monthly snapshots	Current headcount	Current FTE	12M turnover

Business challenge

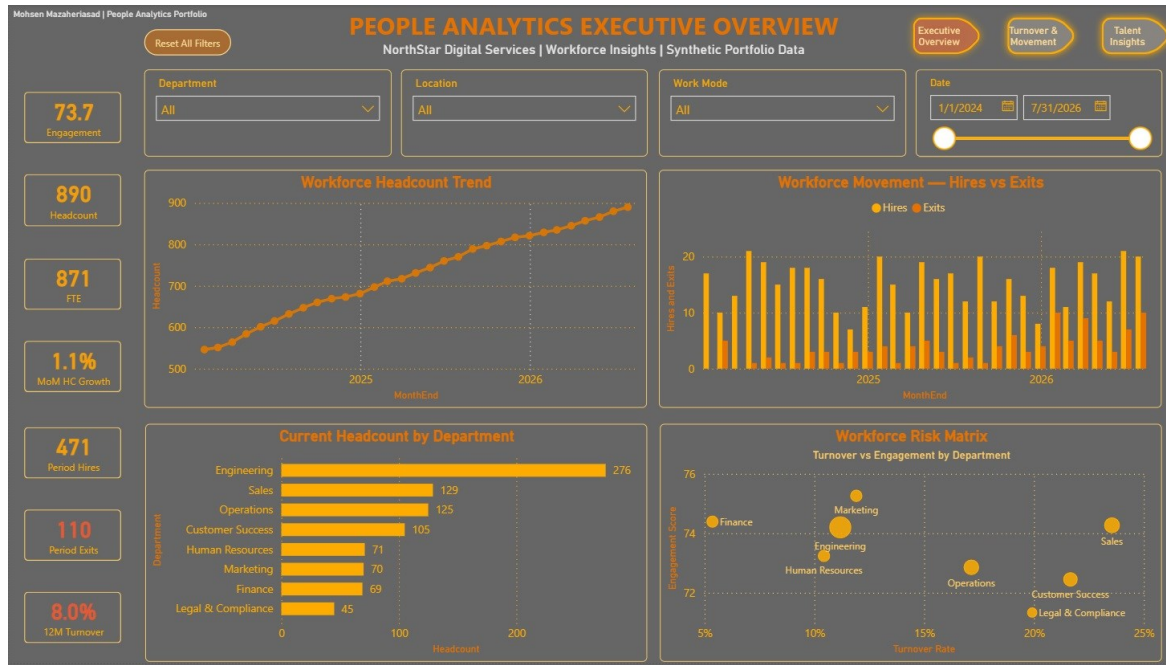

- Leadership needed a consolidated view of workforce growth, retention risk, employee movement, engagement, and talent development.
- The portfolio project needed to demonstrate not only dashboard design, but also data quality, modeling, DAX, diagnostic analysis, and decision support.

Solution

- Built a three-page interactive Power BI dashboard using a star-schema workforce model.
- Created measures for headcount, FTE, hires, exits, 12M turnover, engagement, tenure, promotions, performance, and training.
- Added synchronized slicers, page navigation, reset bookmarks, interactive tooltips, and risk/talent scatter matrices.

EXECUTIVE OVERVIEW

Workforce growth, movement and department-level risk

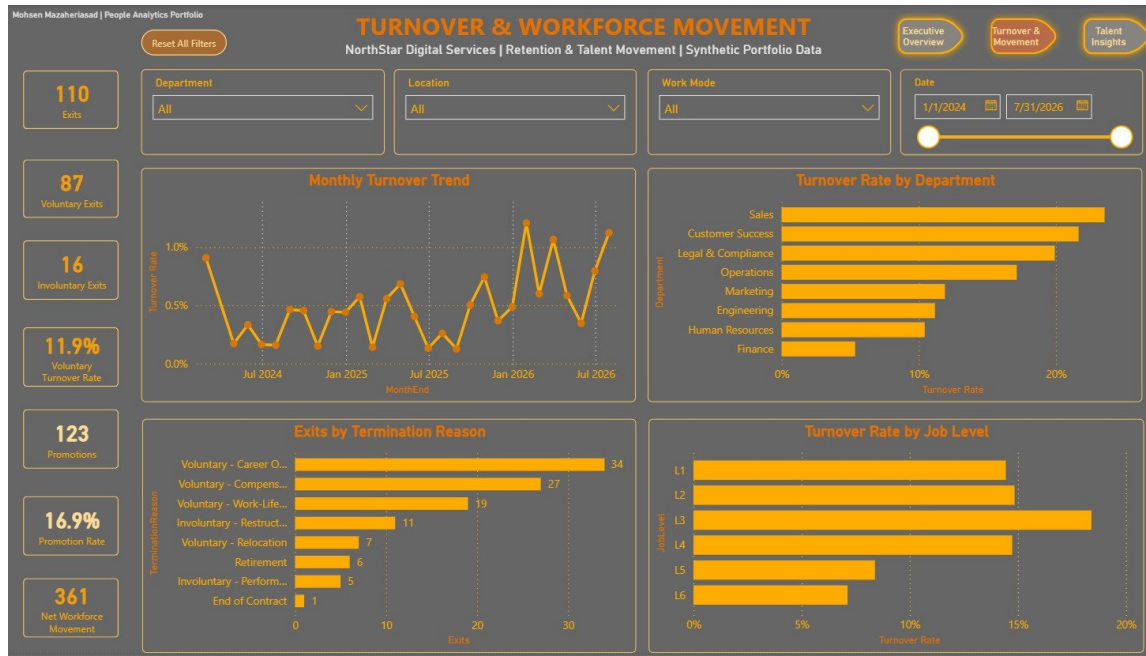

Key findings

- Current headcount: 890; current FTE: 871.2.
- 471 hires and 110 exits during the period produced +361 net workforce movement.
- Engineering is the largest function with 276 employees (31.0% of current headcount).
- The risk matrix highlights Sales, Customer Success, and Legal & Compliance as the highest-turnover functions.
- 12-month turnover at the end of the period is 8.0%.

TURNOVER & RETENTION DIAGNOSTICS

Why employees are leaving and where risk is concentrated

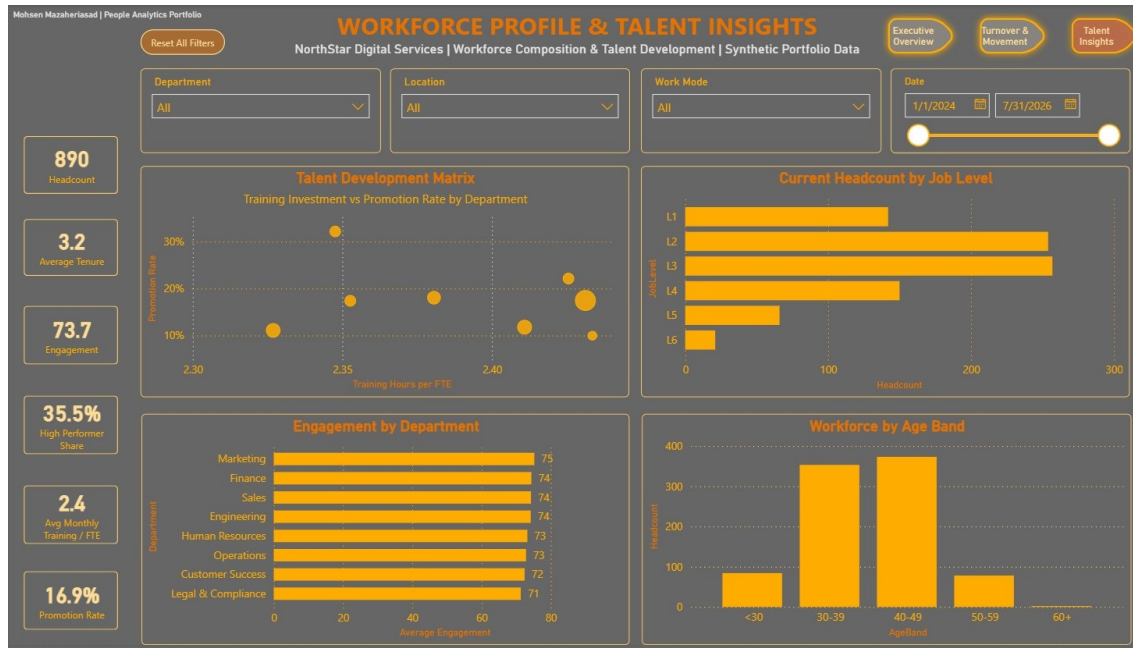

Retention findings

- 87 of 110 exits were voluntary (79.1%).
- Career opportunity, compensation, and work-life balance accounted for 80 exits - about 92.0% of voluntary exits.
- Turnover was highest in Sales (23.6%), Customer Success (21.7%), Legal & Compliance (19.9%), and Operations (17.1%).
- Finance had the lowest turnover at 5.4%, providing an internal benchmark.
- L3 recorded the highest job-level turnover at about 18.4%.

WORKFORCE PROFILE & TALENT INSIGHTS

Workforce composition, engagement and talent development

Talent findings

- Employees aged 30-49 represent about 81.6% of current headcount.
- Average tenure is about 3.2 years; average engagement is 73.7.
- Promotion rates vary from 10.0% in Legal & Compliance to 32.2% in Finance.
- Average monthly training hours/FTE are tightly clustered (~2.33-2.43), so promotion differences are not explained by training volume alone.

Recommendations

- Target retention actions in Sales, Customer Success, Legal & Compliance, and Operations.
- Address career progression, compensation competitiveness, and work-life balance first.
- Review L3 career paths, internal mobility, and pay progression.
- Benchmark Finance practices for transferable retention lessons.
- Investigate why similar training investment produces different promotion outcomes.
